The Trust vision is:

To become the leading integrated health, teaching, research and innovation campus in the NHS and to position itself on an international basis alongside the major biomedical research centres, as part of the thriving city region of Manchester – with its strong emphasis on economic regeneration, science and enterprise.

We aim to position the Trust as:

- The leading provider of tertiary and specialist services in the North West
- A prestigious internationally renowned centre for research and innovation
- An excellent district general hospital for the residents of central Manchester
- At the heart of the regeneration of Manchester
- The best place to train and work

And we are committed to:

- Treating our customers safely, courteously and with dignity and respect
- Providing care and treatments for patients within state of the art facilities that are clean and free from infection
- Delivering care, treatment and advice that combines clinical excellence with the highest standards of patient safety, is based upon the best research and employs the latest clinical technologies
- Offering a unique range of services to the North West treating and managing the simplest to the most complex conditions and diseases

To this end we have a number of principal objectives on which our **Board Assurance Framework** and resulting work plans are based.

The Trust delivers healthcare services to the whole population locally and acts as a tertiary referral centre for a number of different specialties.

The services provided are;

A&E, Anaesthetics, Cardiac, Care of the Elderly, Dentistry, Dietetics, ENT Surgery, Haematology, ITU, Medical Microbiology, Medicine, Neurology, Nuclear Medicine, Ophthalmology, Oral and Max Fax Surgery, Orthopaedics, Paediatrics, Pathology, Psychiatry, Radiography, Rehabilitation, Renal, Respiratory medicine, Rheumatology, General Surgery, Specialist Surgery, Transplant Surgery, Urology, Obstetrics and Learning Disability and Community Health Services.
